Chris,
See answer below on battery chips from [Ex. 6 Personal Privacy (PP)]

Sent from my Verizon, Samsung Galaxy smartphone

Hi [Nonresponsive based on revised scope]
I have a question - how big are the battery chips? Larger than 2.5 inches? Will the handling of them in your excavation and stockpiling activities cause them to break down even more or are they fairly stable? Ray has battery chips up at his sites but they have always been small. I believe we will be ok.

Hi. Appreciate the outstanding service.
We are planning the work on [Ex. 6 Personal Privacy (PP)] across the road from where we meet. It is haz for Pb, some Cd and has plenty of battery chips. We are figuring the quantity out to remove.
How would the battery chips affect the treatment at York? I see the not greater than 50% debris on the attached approval letter.
Thanks [Nonresponsive based on revised scope] and whenever convenient.

<image004.jpg>

No job is so important and no service so urgent, that we cannot take time to perform our work safely.
